FUNDAMENTALS OF WEB SYSTEMS

**Student:** Holger Catucuamba

**NRC:** 4649

## User Description

Kathy is a girl who travels to Ecuador for the first time, she works in the financial sector and knows the basics of handling web applications, she likes that the interface that is shown to the user is easy to handle, with comments on what they should do to advance in the process and that it is also pleasing to the user's eyes. Kathy is going to visit some cities and because of the short distance between the cities, she decided to rent a car. The first thing she wants is to look for a vehicle that is spacious, nice in color and easy to drive, that is, to be able to choose between multiple vehicle options. She also wants to know what the legal conditions are for acquiring this car, if she can drive it with her driving certificate, if she needs insurance or if she needs any other requirement to travel in Ecuador. The last thing you are interested in knowing is the cost of renting the vehicles, the forms of payment, if at the time of entering any form of digital payment it is safe.
