General Reasons for Using a Software System

- Finding some fact or object
- Learning something
- Performing a transaction
- Controlling or monitoring something
- Creating something
- Conversing (or interacting) with other people
- Being entertained
- Making a decision*

- **Finding some fact or object.**

In our interface you can see the different models of shoes that are available, each one has its respective specifications such as model, color, size and price.

- **Performing a transaction.**

Our website was designed for the sale of shoes online which has a shipping section where the customer must enter personal data and payment method to be able to purchase the products.

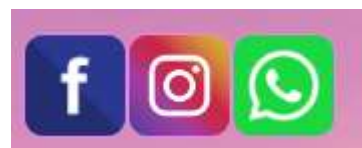

The screenshot shows a web form titled "Space-Ship" with the subtitle "Formulario de envío". The form contains the following fields: "Cedula:" (text input), "Nombre y Apellidos:" (text input), "Celular:" (text input), "Correo Electronico:" (text input), "Provincia:" (dropdown menu with "Azulay" selected), "Direccion:" (text input), and "Metodo de pago:" with two radio button options: "Efectivo" and "Tarjeta". At the bottom of the form are two buttons: "Entrar" and "Cancelar". The background of the form is a light blue gradient with two rocket ship icons on either side of the title.

- **Being entertained.**

Being inside our web page, the user or the client will be able to navigate and visit the content of their preference, since we have styles of shoes for boys, girls, ladies and gentlemen, for when you want to make a purchase you can click on the shoe model you have chosen and will take you to fill out a survey to continue with the purchase process, in the same way you can view our social network pages that also with just one click takes you to the social network you want.

- **Making a decision.**

When the customer wants to make a purchase, he has several options to choose from, and with all the specifications that each product has, the customer can make a decision depending on his tastes and needs.
