### **User Description**

The selected User will be Nicole, she is a housewife, she works in a house next to the micro market, in time of pandemic this family realized about the need to see through a web page the products of first necessity that a micro market would have.

Therefore, Nicole has found a website of a micro market called La Victoria, where she realized that she will be able to visualize different categories and register a detailed list of the products for the daily consumption of the family that she needs to obtain in order to approach the micro market and make her shopping faster and more efficient.

We as creators of the website service provide you with a very easy to use interface design, which will be adequate and detailed to have a better visualization of each product. With this the user experience will be better and she will not have to approach the micro market to just think and make her necessary shopping list, this way Nicole will be able to save a lot of time and do it from the comfort of her home.

In this web page of the micro market La Victoria, Nicole will have to register to be able to provide a correct shipment of the existing products in the micro market, where she will find several categories of products of first necessity and others, which at the moment of choosing a category will be displayed the list of products with their respective prices, in addition it will allow to select the product that the user requires to be able to register a list that will be used at the moment of making the purchase in the micro market.
