User description

In our user description we will use Jordan as an example.

Jordán has a family with his wife and daughters, and an important event is approaching and they want to go well dressed, so Jordán decided to buy clothes for his whole family. But Jordán works very late, which makes it impossible for him to take his family to buy clothes in a mall or store.

So Jordan could be the ideal user to use the Starship online catalog where you can find all kinds of clothing for both men and women, even for boys and girls, fully detailed with sizes and colors so Jordan can buy a change of clothes of clothes for your whole family and you can even create an account for future purchases through the website.

In addition to being able to fill out the home delivery form so that your order can arrive at the door of your home and not interfere with your work schedule, this way it would be much easier for Jordán to buy clothes and not worry about it. office hours or physical stores.
