General Reasons for Using a Software System

- Finding some fact or object
- Learning something
- Performing a transaction
- Controlling or monitoring something
- Creating something
- Conversing (or interacting) with other people
- Being entertained
- Making a decision*

● **Finding some fact or object**

Within the interface you can see what technology products such as computers, phones or printers, along with the features they contain, the price of the product.

● **Performing a transaction**

As the platform is based on E-Commerce sales, which consists of the sale of products, there will always be transactions such as money and items, in addition, the values returned by

the system are the name of the product and the values of each of them, this is Note at the time of placing the order, the amount of that item is indicated and it goes to the payment method, which will be in cash.
